LOUDSPEAKER

## landscape collection

Having mastered the mix of excellence in design, technology and superior sound... outdoor entertainment has never been so complete.

Designed with motion in mind James outdoor systems provide consistent sound levels in multiple stereo listening areas:

by the pool, next to guests mingling at the bbq or surrounding

tennis courts. James' subterranean subwoofer's direct

burial, 10" compression bandpass design creates an earthshaking performance. External hooded port,

Aircraft aluminum enclosure and marine grade hardware allow for protection in extreme weather.

A seamless fusion of visionary technology and revolutionary performance.

We have planted the power at your feet.

*James Loudspeaker... in a class of it's own.*
